

## CARE—A LOT.

**Justice.** Our founders created a system of Justice for We the People that was the envy of the world. In just a dozen years Republicans have corrupted it to where it's taken away the most fundamental right from American women. Never forget.

**Arizona Dreaming.** We all saw the temperatures in Arizona. There's no doubt climate change is real and caused by fossil fuels. Republicans promise to reverse all the good the Biden administration has done.

**33rd & Galena.** When it comes to flavor, much of America's very best is rooted in our Black history. Republicans insist schools lie about just how badly Black Americans have been treated. Their's is the road to fascism.

**Our Black Pepper.** For every jar sold, another is given to someone facing need. Americans who came before, sacrificed much to open the door of opportunity for all. As we pass through, we hold the door open to those who follow. Republicans demand this door be shut. Not on our watch.
